

## APPROVAL IN PRINCIPLE

At the request of:

### InfraCore Company

**BUREAU VERITAS MARINE & OFFSHORE SAS**, acting within the scope of its general conditions<sup>(\*)</sup>, declares hereunder that the design of the:

### FRP Rudder Flap

is **Approved in Principle**, with respect to the aim of the Classification as defined in Part A, chapter I of the latest edition of Bureau Veritas Rules for the Classification of Steel Ships and the conditions stated in ANNEX 1. The present Approval in Principle is referring to the general options chosen by the designer and is based on the documents listed in ANNEX 2.

The validity of this approval may have to be reconsidered, in case of any major modification likely to invalidate the principles shown on these documents. The Approval in Principle would become null and void should Bureau Veritas Marine & Offshore not be kept informed of such modifications.

Prior to the classification and/or certification of a Unit, all relevant drawings, calculation notes, test reports and other documents required by the applicable Rules or necessary to address the technical requirements listed in ANNEX 3 are to be submitted for review, with the aim of issuing a Design Approval certificate.

Issued at Paris La Defense, on 22/12/2021
